

## ***Wart Home Instructions***

---

**1- Wash feet with Fungal Soap Daily**

**2- Blow Dry**

After taking a shower and prior to applying medicine and tape

**3- Apply Wart Stick Daily**

Apply the medicine that you purchased from our office store every day after your shower. Only apply to the wart only not the healthy skin around it.

**4- Apply silver Duct tape**

After applying your medicine, cut a small piece of duct tape and apply it to the area of the wart. Duct tape has chemicals that help against the wart. It also helps occlude the area which also helps in the treatment.

**5- Do not apply medicine and tape 2 days before you come back for your appointment with the doctor.**
